

COMPREHENSIVE CONSULTING SOLUTIONS

MISSION

ENABLING TEXTILE COMPANIES

ACHIEVE SUPERIOR PERFORMANCE.

VISION

TO BE THE MOST DEPENDABLE AND

TRUSTWORTHY TEXTILE MANAGEMENT

CONSULTING COMPANY.

WELCOME TO TTS

"To be the most Dependable and Trustworthy Textile Management Consulting Company for Customers, Shareholders and Employees."

During the four decades that I have been associated with the textile industry, I noticed that compared to the 80s, 90s, and even 2000s, the last decade lost technical experts at a pace faster than it could attract. Not surprisingly, in absence of the right people at the helm of the machines, a lot of value is being lost. Added to this, the industry is deflationary and light-footed. Lack of right expertise, global market forces, and rising factor input costs are the triple

bows that no industry can withstand for long. This inevitably leads to higher waste, while better competitors are emerging globally (with newer technologies) and rising factor input costs have become a norm.

We believe that operational efficiency, with a commitment to quality, is the way forward to safeguard the value of the industry.

TTS was born, a decade ago, with our desire to bring technical expertise to the Industry at large and help it scale newer heights. We have been working across the globe and generating value for our clients and the community. Over the last decade, TTS has helped more than 60 textile companies to realize their performance potential.

Rajaguru Raja
Managing Director
Texcoms Textile Solutions

Looking forward to working together for sustainable growth of the industry I present to you this brochure.

WHY US

Our team is comprised of industry seasoned professionals. This brings an **'Industry-ready' approach to our solutions** fully acknowledging the implications of practical implementation.

Industry Specialists

With Industry wide experience spanning decades, TTS consultants have **'earned'** the capability to advise the Industry and entrepreneurs.

Practical Implementation

With a team of seasoned professionals TTS operates manufacturing facilities around the globe ensuring **globally benchmarked** efficiencies and profit levels.

End-to-End Solutions

TTS is unique in its ability to provide services from **'concept to commissioning'** and beyond.

Global Presence

A Global presence, TTS has developed understanding of the industry's subtleties, giving it a **competitive edge**.

Comprehensive Solutions under one roof

With our presence in various geographies and with extensive industry experience, we are proud to bring global perspective and decades of shop-floor experience. Our solutions spectrum comprises of 'Strategy development to commissioning' of textile plants. This width in our service offerings, helps us to offer and to implement solutions from conceptualization to implementation stage.

OUR TEAM

We are passionate for the textile industry. With an average experience of three decades gained working across the globe, the team has a mix of people with strong analytics, business focus and actual Industry understanding. This enables us to deliver award winning work and develop repeat clientele.

OUR APPROACH

GAP ANALYSIS

We conduct a thorough diagnostic study of the existing set-up. The diagnosis is both onsite and offsite.

ROADMAP

Based on the study, we offer recommendations and roadmap for intervention based benchmarking and capacity building.

ACTION PLAN

Based on the exact goals of the client, we customize our Action plan to implement the recommendations.

REVIEW

Review the progress of action plan and ensure the results.

SOME SUCCESSFUL PARTNERSHIPS...

Our Solutions Strategy 4D

- **Discover** - In depth assessment of to discover Gaps
- **Diagnose** - Diagnose the root cause
- **Design** - Design a roadmap towards recovery and health
- **Deliver** - Deliver on the floor leading to direct bottom-line impact

THE GROUP

Creating value adding ecosystems for the Textile Industry

Texcoms Worldwide Group offers Textile Business Solutions across the Textile Value chain. Operations involve sourcing and supplying of high-quality pre-owned textile machinery, sourcing of specialized yarn and fabric globally and performance enhancement & efficiency improvement services in Textile Industry.
